EDUCATION

BS Information Technology, Computer Studies

FEU Institute of Technology 01/2012 - 01/2016

SUMMARY

With almost a decade of experience in product development, I have gained a broad range of technical expertise across multiple domains. I'm confident that my skills in both frontend and backend development are sufficient to solve even the most complex features.

Combined with my knowledge of system architecture, I'm not only capable of developing products across all platforms but also overseeing the overall infrastructure.

With my skill set I position myself as a strong candidate for the role that I am applying.

Currently, I am broadening my expertise by venturing into the world of AI—gaining knowledge in various models and deepening my understanding of LLMs and RAG.

I am also in the process of developing my own startup and beginning my journey in business development.

SKILLS

JavaScript, Typescript, Frontend, Backend, Database, AWS, Web Development, Microservice, Mobile Development, System Architecture, Database Design

React, React Native, Expo, NextJS, NestJS, MySQL, PostgreSQL, Kafka, gRPC, Node.js, Websockets
